Screenshot:

Initial To-Do List:

The screenshot shows a web application titled "To-Do List". At the top, there is a text input field with the placeholder "Enter a task" and a green "Add Task" button. Below this, there is a list of 10 tasks, each in a light gray box with a red "Delete" button to its right. The tasks are: "take gran to the doctor", "get boba for sis", "do laundry", "finish cloud computing project", "finish senior design project", "finish linear algebra project", "study for complex analysis exam", "study for real analysis exam", and "abort mission".

After removing the first, last, and middle task:

The screenshot shows the same "To-Do List" application after three tasks have been removed. The list now contains 7 tasks: "get boba for sis", "do laundry", "finish cloud computing project", "finish linear algebra project", "study for complex analysis exam", and "study for real analysis exam". The "take gran to the doctor" task has been removed from the top, and the "abort mission" task has been removed from the bottom. The "do laundry" task, which was the middle task in the original list, remains in the center.
